The Digital Quote Manager is a sales tool that works in conjunction with e-automate where sales reps can create sales quotes with correct equipment configurations eliminating entry error. The equipment configurations and rules, such as limits and defaults, are previously defined by the admin in the Digital Quote Manager Admin, the configuration component of the Digital Quote Manager. To install the Digital Quote Manager use the following instructions.

- 1. Navigate to the directory location where you have saved the files.
- 2. Double-click on the DGI.SalesQuoteManager.exe file to launch the Install.

3. Click [Next>] to display the Select Installation Folder window.

闄 Digital Quote Manager	
Select Installation Folder	TALQUOTE MANAGER.
The installer will install Digital Quote Manager to the following folder. To install in this folder, click "Next". To install to a different folder, enter it belo	w or click "Browse".
Eolder: C:\Program Files (x86)\e-automate\e-configurator\	B <u>r</u> owse Disk Cost
Cancel < <u>B</u> ack	Next >

4. If you want to view the amount of space this application will use, click [Disk Cost...].

14. Click [Close] to exit.

Digital Quote Manager Licensing

After you have installed your Digital Quote Manager software you must obtain and activate a license key in order to use DQM. DQM licenses work on a week lease basis. You must purchase a copy of DQM for each sales rep. The DQM licensing process does not allow your sales reps to share. Each copy of DQM is based on a week lease system. This means that each copy is good for 7 days from the last login. For example, if you login on Monday the copy is good for 7 days from Monday and then you log in on Tuesday the copy is good for 7 days from Tuesday, Wednesday, 7 days from Wednesday, and so on. If you do not log in to DQM within 7 days from the last time you logged in the copy is open for another user to use. If a different user logs in, that copy will be locked to that user for 7 days from the last day they logged in. As long as the sales rep logs in within 7 days from the first login, the copy will remain tied to that user. If you have a situation where a sales rep leaves the company and you need to tie their copy to a new sales rep before the 7 days has been reached, contact Digital Gateway Customer Care to reassign the copy.

The licensing for Digital Quote Manager is managed within your e-automate system, through your e-automate license key. Digital Gateway will need to generate a new e-automate license key for you to be able to use Digital Quote Manager. The e-automate license key is based on the Server Identification Code for your e-automate system.

To obtain a new e-automate license key to use your Digital Quote Manager software, do the following:

Last Update: 10/22/12

- 1. In e-admin, click [License keys] to open the Manage users and licenses window.
- 2. From the **Server identification code** field, copy the code.

Manage users and licenses	×
License version: 8.0 Registered to: DG00	Server identification code: OP-000963814887 New license key
User connections SQL connections	Upoate
e-automate (0 of 3 users) e-info (Site License) Digital Barcode (Site License) Digital Quote Manager (0 of 10 users) Partner Integration Portal (0 of 3 users) e-automate Commissions Module PO Processor
